Why is Bridlington like it is?

Bridlington has got lots of natural features like the beaches and the cliffs and the sea. At one end of the bay there is Flamborough head a big cliff that people like to go and of course the sea. The beaches are very long and there is a magnificent bay the boats can use for sailing and fishing. The beaches are called the north and south beach. They also use the beach to collect shells in the rock pools. The North beach has the blue flag which means that it is very clean.

There are lots of man-made features as well like the harbour and the fun fair and the shops. The fun fair was put there because the beach was so popular with tourists. The beaches are very luxurious with its donkeys and beach huts. The shops sell a range of different things like information about Bridlington and souvenirs. There are also some shops which sell things for the beach On Flamborough head there is a lighthouse and around the corner there is a bird sanctuary called Bempton and people visit it to see the birds and the light house. In the town there is also lots of fish and chip shops and lots of coach and bus parking around Brid. There is also a mini train that can take people to Sewerby and back on the road. There is also a marina and a promenade.
